

NOTICE OF PUBLIC HEARING

On Proposed Dolton Road/State Street Industrial Region (DSIR) CORRIDOR PLAN City of Calumet City, County of Cook, Illinois

Notice is hereby given to all interested persons that the City of Calumet City will hold an Open Public Hearing at the City Hall, 204 Pulaski Road, Second Floor, Calumet City, Illinois, on Wednesday, February 12, 2020, at 5pm.

Calumet City is pursuing a corridor plan for the Dolton Road / State Street Industrial Region (DSIR) Corridor that is reflective of business vibrancy and community character. Spanning nearly three miles between Interstate 94 and State Line Road in Illinois, the DSIR Corridor serves some of the region's most successful industrial businesses, single-family and multi-family residences, commercial businesses, and Forest Preserve open spaces.

The overall purpose of this corridor plan is to make recommendations for roadway and right-of-way improvements to best serve the growing business community of the Dolton Road State Street Industrial Corridor. The goal of the study is to recommend solutions for a safe and efficient truck route while also meeting the community's goals of improving access to regional bike trails and enhancing the overall character of the corridor – and to build capacity to pursue grant money in this regard.

The corridor traverses through the City of Calumet City and the Village of Burnham. As such, coordination between communities is critical towards development of Dolton Road / State Street as a vibrant mixed-use corridor with regional connections to the market and natural open spaces.
