

Custom Offering Commercial and Industrial

Starting fresh with a major renovation, system upgrade or new project? The ComEd Energy Efficiency Program provides incentives based on verified energy savings that could cover up to 100% of project costs through our Custom offering. Your qualifying projects could earn up to \$0.18 per kWh saved in the first year of operation.

Solutions and Support Tailored to Your Needs

If you're exploring options to update your facility, our team of energy efficiency experts will work with you to identify and implement the best opportunities for energy savings. Once your project is defined, we'll support you through the application process, implementation, and measurement and verification.

The tailored energy efficiency solutions available through our Custom offering are as diverse as the businesses we serve. Whether you're already exploring specific equipment updates, or you're just starting to think that there's got to be a better way, our team can help you work through your options.

What's the Catch?

There's no catch. When systems are running more efficiently, industrial sites use less electricity.

Benefits

Customers participating in the Custom offering benefit from:

- Incentives and quicker payback periods
- Energy cost savings
- Technical support
- Improved operations
- Positive sustainability goal impacts
- Application assistance

How to Get Started

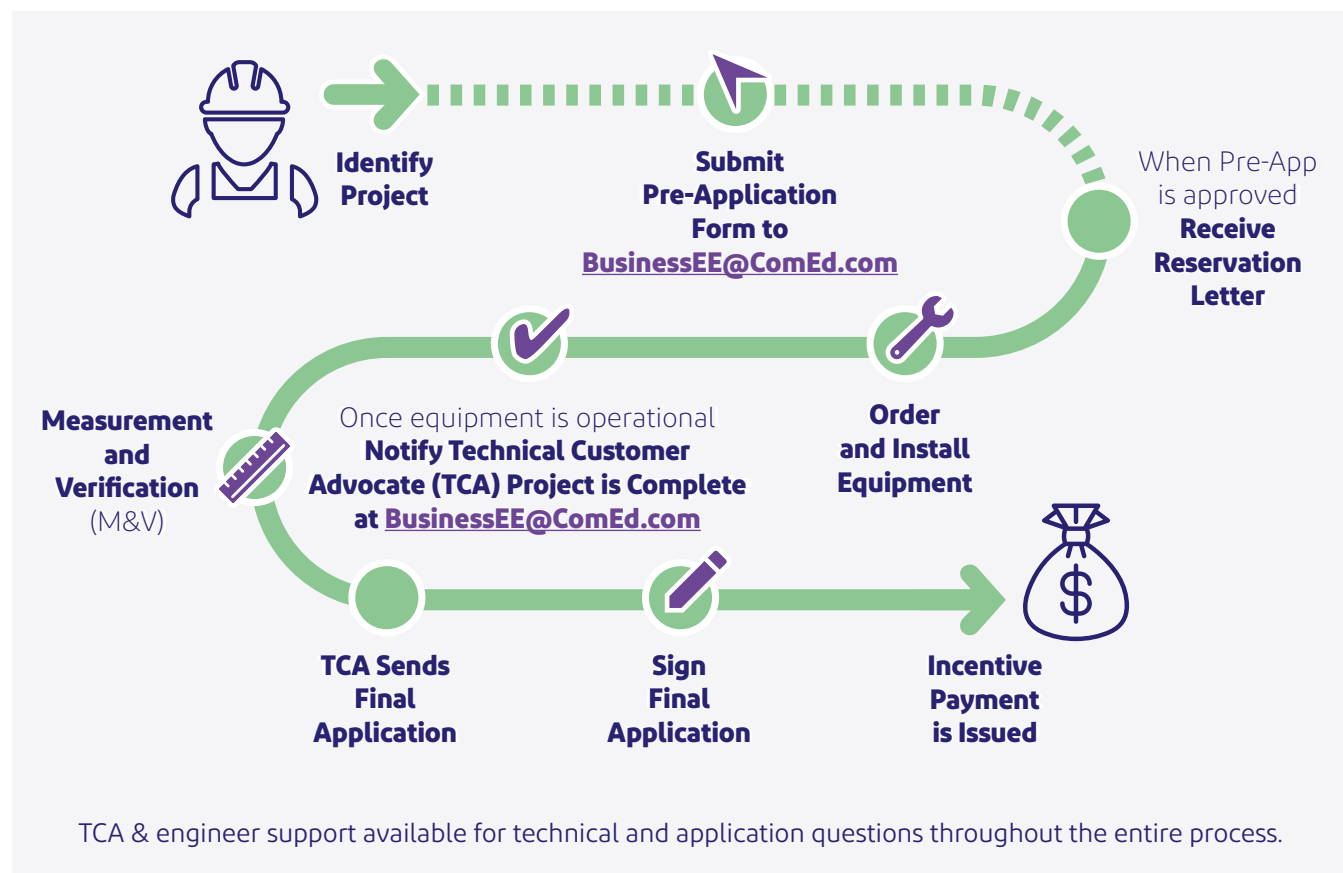

Contact us and we'll collaborate to better understand your priorities and goals and define the right project incentive opportunities.
