LEAD SERVICE LINE REPLACEMENT PROGRAM

Construction of Lead Service Line Replacements in Wards 6 & 7 of the Calumet City distribution system were financed by the Drinking Water State Revolving Fund (SRF). The SRF program is administered by the Illinois Environmental Protection Agency and receives a portion of its money to fund these types of projects from the U.S. Environmental Protection Agency. This project includes replacement of approximately 300 lead service lines. Once complete, it will **improve** water quality for area residents and businesses in Calumet City by completely removing lead service lines. SRF programs operate in each state to provide communities the resources necessary to build, maintain, and improve the infrastructure that protects one of our most valuable resources: water.
